Pancurendang RT 04 / RW 01, Ajibarang, Banyumas, Jawa Tengah

"Informatics graduate from Jenderal Soedirman University and Full Stack Developer with experience in building web based applications. Passionate about developing scalable digital solutions and continuously improving through hands on projects and real world problem solving."

Work Experiences

CV Jenderal Solusi Digital - **Sokaraja** May 2024 - Aug 2024

Full Stack Developer

A technology consulting and software engineering company based in Sokaraja (Purwokerto), Central Java. Specializing in web and mobile application development, as well as information systems and custom web services

- Developed a Hospital Information System using Laravel (PHP framework) and PostgreSQL as the database system.
- Focused on the Emergency Room (IGD) and Laboratory modules, handling both front-end and back-end development.
- Collaborated with a team to ensure system functionality met hospital workflow requirements.

Jenderal Soedirman University - **Purbalingga** Aug 2024 - Dec 2024

Laboratory Assistant - Web Programming 1

Become a tutor in Web Programming 1 practical courses. Assist, conceptualize the course of the practicum, and plan learning techniques for the practicums

- Assisted students in learning fundamental web technologies such as HTML, CSS, JavaScript, and PHP.
- Guided students through hands-on lab sessions to build dynamic web pages and simple web applications.
- Supported students in debugging code and understanding web development logic.
- Evaluated student assignments and provided feedback to enhance their coding skills.

Jenderal Soedirman University - **Purbalingga** Feb 2025 - Jul 2025

Laboratory Assistant - Computer Networking

Become a tutor in Computer Networking practical courses. Assist, conceptualize the course of the practicum, and plan learning techniques for the practicums

- Guided students in understanding key networking concepts
- Taught students how to simulate networking using Cisco Packet Tracer.
- Evaluated student assignments and provided constructive feedback.

CV Jenderal Solusi Digital - **Sokaraja** Aug 2025 - Feb 2026

Full Stack Developer

A technology consulting and software engineering company based in Sokaraja (Purwokerto), Central Java. Specializing in web and mobile application development, as well as information systems and custom web services

- Developed a full-featured Learning Management System using TALL Stack (Tailwind CSS, Alpine.js, Laravel, Livewire).
- Built interactive AI-powered chatbot for real-time student assistance.
- Implemented AI-based content generation for learning materials, quizzes, and exams.
- Integrated AI feedback system to automatically evaluate answers and generate detailed explanations for why answers are correct or incorrect.
- Designed responsive UI and optimized backend performance for scalable usage.

Ozolab ID - **Purwokerto** Jan 2026 - Feb 2026

Full Stack Developer

A technology consulting and software engineering company

- Developed a web-based Padel Tournament Management System using Laravel, Inertia.js, Animate UI, and MySQL.
- Built dynamic player point calculation system to manage rankings and performance statistics.
- Implemented automated tournament bracket generation for knockout-style competitions.
- Developed comprehensive match management module including scheduling, live scoring and result recording, and match status tracking.
- Optimized database schema and backend logic to ensure accurate scoring computation and scalable tournament operations.

Education Level

Universitas Jenderal Soedirman - **Purwokerto** Aug 2022 - Mar 2026

Bachelor of Informatics, 3.92/4.00

- Developed a hospital information system website utilizing native PHP, HTML, CSS, JavaScript, and MySQL to manage essential medical operations.
- Created “TukuTick”, a Laravel-based ticketing platform designed to minimize scalping by implementing a pre-order and gacha (random draw) system, ensuring each user can only place one valid pre-order per event.

- Designed and implemented "LAMA", a mobile application for managing anime lists, using Angular framework integrated with Firebase services.

Organisational Experience

Himpunan Mahasiswa Informatika/Paguyuban Sinau Programming - **Purbalingga** Sep 2024 - Oct 2024

Progamming Instructor

Purbalingga

- Taught fundamental web development concepts including HTML, CSS, and basic JavaScript.
- Introduced beginner-friendly tools such as Visual Studio Code and GitHub for practical usage.
- Prepared and delivered structured learning materials for beginner-level participants.
- Guided hands-on coding sessions and live demonstrations via in-person meetups.
- Created interactive mini-projects to help participants practice and apply what they learned.

Skills, Achievements & Other Experience
